

PRASHANT KUMAR

Senior Frontend Engineer | Frontend Lead | UI / Frontend Architect

+91-9031160997 | prashant5230.kr@gmail.com | linkedin.com/in/prashant-kumar-lead/ | Portfolio: prashantkr-git.github.io/portfolio/
| India

PROFESSIONAL SUMMARY

Senior Frontend Engineer / Lead Developer with 9+ years of experience building scalable enterprise web applications, leading frontend teams, and driving frontend architecture, performance, and engineering best practices. Strong expertise in Angular, TypeScript, JavaScript, React, SAP Commerce Cloud, SAP Composable Storefront (Spartacus), Micro Frontends, Nx, REST API integration, SSR, SEO, Core Web Vitals, and responsive UI development. Proven record of leading distributed teams, improving delivery speed and application performance, conducting code reviews, collaborating with product, design, and backend teams, and delivering maintainable, high-quality frontend solutions.

TECHNICAL SKILLS

- Frontend: Angular, TypeScript, JavaScript, React, HTML5, CSS3, SCSS, jQuery, AJAX, JSON
- SAP Commerce: SAP Commerce Cloud, SAP Composable Storefront, Spartacus, Headless Commerce, Storefront Customization
- Architecture: Frontend Architecture, UI Architecture, Micro Frontends, Nx, Luigi, Lerna, Modular Architecture, Reusable Components
- Performance & SEO: Web Performance Optimization, Core Web Vitals, Lighthouse, SSR, Page Load Optimization, Responsive Design, SEO
- Integration & Engineering: REST APIs, API Integration, Code Reviews, Technical Leadership, Agile/Scrum, Git, CI/CD, Cypress, Test Automation
- Other: Node.js, Shell Scripting, Google Search Console, Bing Webmaster Tools

PROFESSIONAL EXPERIENCE

Lead Software Engineer | Atstratus S.A. — Cloudflight (Client: AGCO) | Feb 2025 – Present | Remote

- Drive frontend development and technical implementation for enterprise e-commerce solutions built with Angular and SAP Commerce Composable Storefront (Spartacus).
- Improved initial storefront page-load time by 40% through component architecture optimization, Angular performance practices, and targeted frontend refactoring.
- Design and implement scalable Spartacus storefront functionality, including service customization, reusable components, and backend API integration within a headless commerce architecture.
- Contribute to frontend technical design, modular architecture, performance optimization, technical problem solving, and engineering standards across a distributed Agile development team.
- Analyze complex frontend issues, identify root causes, and drive technical solutions across application, API integration, rendering, and performance layers.
- Conduct code reviews and provide technical guidance to maintain code quality, scalability, maintainability, and consistency across the frontend codebase.
- Collaborate with backend engineers, product stakeholders, UX/UI teams, and other technical teams to translate business requirements into scalable frontend solutions.

Senior Technical Lead | Comviva Technologies | Aug 2021 – Jan 2025 | Remote

- Led a distributed frontend engineering team of 7–10 developers, providing technical direction, implementation guidance, code reviews, and architectural oversight for enterprise Angular applications.
- Improved development delivery speed by 80% through technical leadership, development standardization, architecture compliance, and improved team execution practices.
- Defined and guided frontend implementation approaches for scalable finance applications, ensuring alignment with established architecture, coding standards, and engineering best practices.
- Translated product requirements into technical solutions by collaborating with product managers, UX/UI designers, backend engineers, and cross-functional stakeholders across multiple time zones.
- Established and enforced frontend engineering standards through code reviews, reusable implementation patterns, development guidelines, and technical mentoring.
- Evaluated Micro Frontend architecture through proof-of-concept implementations using Nx and Luigi, assessing modularity, application boundaries, and independent frontend development.

- Supported technical decision-making, complex issue resolution, and continuous improvement across the frontend engineering lifecycle.
- Worked with Cypress and test automation practices to improve application reliability and development quality.

Software Development Engineer | Hopscotch Wholesale Trading Pvt Ltd | Mar 2021 – Jul 2021 | Remote

- Led the modernization of a monolithic frontend by introducing a modular package architecture using Lerna, improving maintainability and enabling parallel feature development.
- Partnered with backend engineers to define and refine REST API contracts, improving frontend/backend alignment and reducing development dependencies.
- Evaluated frontend architecture and modularization opportunities to improve maintainability, development scalability, and time-to-market.
- Conducted SEO and frontend performance audits and implemented mobile-first optimization strategies across the application.
- Achieved a 20% improvement in mobile performance scores through Lighthouse-driven optimization and responsive frontend improvements.

Frontend Developer | AdGlobal360 India Pvt Ltd | Jun 2019 – Mar 2021 | Gurgaon, India

- Designed and developed scalable frontend applications for automotive platforms using modern frontend architecture and responsive web development practices.
- Improved application performance and user experience through frontend code optimization, page-load improvements, and structural refactoring.
- Delivered a software update that reduced system errors by 30% and improved application performance by 25%.
- Collaborated with UX/UI stakeholders to assess technical feasibility, translate designs into production-ready interfaces, and optimize solutions for scalability and performance.
- Developed and executed data-driven SEO initiatives that increased website traffic by 25%.
- Used Google Search Console and Bing Webmaster Tools to monitor search performance, identify technical issues, and drive frontend optimization.

Web Developer | Infodeal Technologies Pvt Ltd | Feb 2017 – Feb 2019 | Pune, India

- Translated business and functional requirements into responsive, maintainable web applications using HTML5, CSS3, JavaScript, jQuery, AJAX, and JSON.
- Developed reusable frontend components within an MVC-based microarchitecture using established design patterns.
- Integrated RESTful web services between client-side and server-side applications and collaborated with backend teams on data integration.
- Resolved cross-browser and cross-platform compatibility issues to deliver consistent responsive experiences.
- Contributed to frontend coding standards, reusable implementation patterns, and development efficiency.

Software Engineer Trainee | Cognitive Machines Software Solutions Ltd | Aug 2016 – Nov 2016 | Bangalore, India

- Developed responsive web interfaces for automotive applications, contributing to a 30% improvement in user experience.
- Applied frontend coding standards and development best practices to improve consistency and maintainability.
- Optimized page size and load times using frontend optimization techniques including image sprites.
- Collaborated with UI/UX teams to ensure technical feasibility, responsiveness, performance, and scalability of implemented interfaces.

ARCHITECTURE & TECHNICAL HIGHLIGHTS

- **Frontend Architecture:** Experience designing modular, maintainable frontend structures for enterprise applications with a focus on scalability, separation of concerns, reusable components, and long-term maintainability.
- **Technical Leadership:** Led distributed frontend teams of 7–10 engineers, providing technical direction, mentoring, code reviews, architecture guidance, and engineering standards.
- **Architecture Governance:** Supported architecture compliance through technical reviews, reusable patterns, coding standards, and consistent implementation practices across development teams.
- **Technical Decision-Making:** Evaluated technical approaches, identified architectural trade-offs, and translated functional requirements into scalable frontend implementation strategies.
- **SAP Commerce Composable Storefront:** Hands-on experience building and enhancing enterprise Angular/Spartacus storefronts, customizing Spartacus services, integrating backend APIs, and implementing modular storefront functionality.
- **Headless Commerce:** Experience working within headless/composable commerce architectures, connecting frontend storefront capabilities with backend commerce services through APIs.

- **Micro Frontends:** Hands-on proof-of-concept experience with Nx and Luigi, evaluating modular frontend architecture and independently maintainable application boundaries.
- **Frontend Modularization:** Led migration from a monolithic frontend toward modular packages using Lerna, enabling parallel development and improving maintainability.
- **Reusable Architecture:** Experience developing reusable components, services, packages, and implementation patterns to reduce duplication and improve consistency.
- **Web Performance:** Experience diagnosing and optimizing frontend rendering, component structures, page-load performance, and responsive experiences.
- **Performance Optimization:** Delivered measurable improvements including 40% faster initial page load, 20% improved mobile performance, and 85% improved Internet Banking application performance.
- **Performance Tooling:** Experience using Lighthouse and frontend performance analysis to identify optimization opportunities and validate improvements.
- **Modern Web Performance:** Knowledge of Core Web Vitals, SSR, responsive design, lazy-loading strategies, caching, and frontend rendering optimization.
- **Technical SEO:** Experience conducting SEO audits and implementing frontend changes to improve search visibility and technical SEO performance.
- **Cross-Functional Engineering:** Collaborate with product managers, UX/UI designers, backend engineers, QA, DevOps, and distributed engineering teams to deliver enterprise applications.
- **Engineering Delivery:** Experienced in translating business requirements into technical solutions while balancing user experience, scalability, performance, maintainability, and delivery timelines.

KEY ACHIEVEMENTS

- Improved AGCO SAP Spartacus storefront initial page load time by 40%.
- Led a 7–10 member remote frontend team and improved delivery speed by 80%.
- Improved Internet Banking application performance by 85% through frontend rendering optimization.
- Achieved 20% improvement in mobile performance through Lighthouse and responsive optimization.
- Reduced system errors by 30% and improved application performance by 25%.
- Increased website traffic by 25% through data-driven SEO initiatives.

EDUCATION

Master of Computer Application (MCA) — National Institute of Technology, Jamshedpur | 2013 – 2016

Bachelor of Science in Information Technology — Kolhan University, Chaibasa | 2010 – 2013

TARGET ROLES

Senior Frontend Engineer | Lead Frontend Engineer | Frontend Lead | Principal Frontend Engineer | UI Architect | Frontend Architect | Technical Architect
