Jamshedpur, Jharkhand, India (Open to Remote - Global)

PROFESSIONAL SUMMARY

Senior Frontend Engineer and Lead with 9+ years of experience architecting enterprise-grade web applications for global organizations. Proven track record of leading distributed teams across time zones, driving frontend strategy, performance optimization, and engineering excellence. Deep expertise in Angular, TypeScript, React, and SAP Commerce (Spartacus) within headless and micro-frontend architectures. Passionate about delivering measurable results—improving page load speeds by 40%, development velocity by 80%, and user experience through data-driven optimization. Seeking senior remote roles where I can lead technical strategy and mentor high-performing frontend teams.

TECHNICAL SKILLS

- **Frontend:** Angular, TypeScript, JavaScript, React, HTML5, CSS3, SCSS, jQuery
- **SAP Commerce:** SAP Commerce Cloud, Spartacus, Headless Commerce, Storefront Customization
- **Architecture:** Micro Frontends (Nx, Luigi), Lerna, Modular Design, Reusable Components
- **Performance & SEO:** Core Web Vitals, Lighthouse, SSR, Page Load Optimization, Responsive Design
- **Engineering:** REST APIs, CI/CD, Git, Cypress, Test Automation, Agile/Scrum
- **Other:** Node.js, Shell Scripting, Google Search Console, Bing Webmaster Tools

PROFESSIONAL EXPERIENCE

Lead Software Engineer | Atstratus S.A. — Cloudflight (Client: AGCO)

Feb 2025 – Present | Remote

- **Led frontend development** for enterprise e-commerce solutions using Angular and SAP Commerce Composable Storefront (Spartacus), driving technical implementation across distributed teams
- **Optimized storefront performance**, achieving a **40% reduction in initial page-load time** through component architecture refactoring, Angular best practices, and targeted performance improvements
- **Designed and implemented scalable Spartacus storefront features**, including service customization, reusable components, and seamless backend API integration within a headless commerce ecosystem
- **Drove technical design and architecture decisions**, establishing modular patterns, performance standards, and engineering best practices across the development lifecycle
- **Resolved complex frontend issues** across application, API integration, and rendering layers, ensuring stability and high performance
- **Enforced code quality and consistency** through rigorous code reviews, technical mentoring, and adherence to scalable, maintainable coding standards
- **Collaborated cross-functionally** with backend engineers, product owners, UX/UI designers, and QA to translate business requirements into robust, user-centric frontend solutions

Senior Technical Lead | Comviva Technologies

Aug 2021 – Jan 2025 | Remote

- **Led and mentored a distributed team of 7–10 frontend engineers**, providing technical direction, architectural oversight, and implementation guidance for enterprise Angular applications
- **Drove an 80% improvement in development delivery speed** by establishing coding standards, refining execution processes, and enforcing architecture compliance
- **Defined frontend implementation strategies** for large-scale finance applications, ensuring alignment with architecture, scalability requirements, and engineering best practices
- **Translated product requirements into technical solutions** through close collaboration with product managers, UX/UI designers, and backend teams across multiple time zones
- **Established and enforced engineering standards**, promoting reusable patterns, code review rigor, and continuous technical mentoring
- **Led a proof-of-concept for Micro Frontend architecture** using Nx and Luigi, evaluating modularity, application boundaries, and team independence for future adoption

- **Improved application reliability and quality** by integrating Cypress for test automation and driving continuous improvement in development practices

Software Development Engineer | Hopscotch Wholesale Trading Pvt Ltd

Mar 2021 – Jul 2021 | Remote

- **Modernized a monolithic frontend** by introducing a modular package architecture using Lerna, improving maintainability and enabling parallel feature development
- **Partnered with backend teams** to define and refine REST API contracts, reducing frontend/backend dependencies and accelerating development cycles
- **Evaluated architecture and modularization opportunities**, implementing solutions that improved scalability, maintainability, and time-to-market
- **Conducted comprehensive SEO and performance audits**, implementing mobile-first optimization strategies that achieved a **20% improvement in mobile performance scores** (measured via Lighthouse)
- **Optimized frontend rendering and responsiveness**, ensuring a seamless user experience across all devices and screen sizes

Frontend Developer | AdGlobal360 India Pvt Ltd

Jun 2019 – Mar 2021 | Gurgaon, India

- **Designed and developed scalable frontend applications** for automotive platforms, focusing on modern architecture, responsive design, and optimal user experience
- **Drove performance improvements** through code optimization, page-load enhancements, and structural refactoring, resulting in a **25% improvement in application performance and a 30% reduction in system errors**
- **Translated UX/UI designs into production-ready interfaces**, ensuring technical feasibility, scalability, and performance optimization
- **Led data-driven SEO initiatives** that increased website traffic by **25%**, using Google Search Console and Bing Webmaster Tools to monitor performance and identify optimization opportunities
- **Collaborated with stakeholders** to assess technical feasibility and optimize solutions for both performance and business impact

Web Developer | Infodeal Technologies Pvt Ltd

Feb 2017 – Feb 2019 | Pune, India

- **Developed responsive, maintainable web applications** using HTML5, CSS3, JavaScript, jQuery, AJAX, and JSON, translating business requirements into functional interfaces
- **Built reusable frontend components** within an MVC-based architecture, applying established design patterns for consistency and efficiency
- **Integrated RESTful web services** between client-side and server-side applications, collaborating closely with backend teams on seamless data integration
- **Resolved cross-browser and cross-platform compatibility issues**, ensuring consistent responsive experiences across all environment
- **Contributed to frontend coding standards and implementation patterns**, improving development efficiency and code maintainability

Software Engineer Trainee | Cognitive Machines Software Solutions Ltd

Aug 2016 – Nov 2016 | Bangalore, India

- **Developed responsive web interfaces** for automotive applications, delivering a **30% improvement in user experience** through optimized UI/UX design
- **Applied frontend coding standards and development best practices**, ensuring consistency, maintainability, and scalability of implemented solutions
- **Optimized page size and load times** using frontend optimization techniques, including image sprites and efficient asset management
- **Collaborated with UI/UX teams** to ensure technical feasibility, responsiveness, and high-performance interface implementation

EDUCATION

Master of Computer Application (MCA) — National Institute of Technology, Jamshedpur | 2013 – 2016

Bachelor of Science in Information Technology — Kolhan University, Chaibasa | 2010 – 2013
