PROFESSIONAL SUMMARY

Senior Frontend Engineer / Lead Developer with 9+ years of experience building scalable enterprise web applications, leading frontend teams, and driving frontend architecture, performance, and engineering best practices. Strong expertise in Angular, TypeScript, JavaScript, React, SAP Commerce Cloud, SAP Composable Storefront (Spartacus), Micro Frontends, Nx, REST API integration, SSR, SEO, Core Web Vitals, and responsive UI development. Proven record of leading distributed teams, improving delivery speed and application performance, conducting code reviews, collaborating with product/design/backend teams, and delivering maintainable, high-quality frontend solutions.

TECHNICAL SKILLS

- Frontend: Angular, TypeScript, JavaScript, React, HTML5, CSS3, SCSS, jQuery, AJAX, JSON
- SAP Commerce: SAP Commerce Cloud, SAP Composable Storefront, Spartacus, Headless Commerce, Storefront Customization
- Architecture: Frontend Architecture, UI Architecture, Micro Frontends, Nx, Luigi, Lerna, Modular Architecture, Reusable Components
- Performance & SEO: Web Performance Optimization, Core Web Vitals, Lighthouse, SSR, Page Load Optimization, Responsive Design, SEO
- Integration & Engineering: REST APIs, API Integration, Code Reviews, Technical Leadership, Agile/Scrum, Git, CI/CD, Cypress, Test Automation
- Other: Node.js, Shell Scripting, Google Search Console

PROFESSIONAL EXPERIENCE

Lead Software Engineer | Atstratus S.A. — Cloudflight (Client: AGCO) | Feb 2025 – Present | Remote

- Develop and optimize enterprise e-commerce functionality using Angular and SAP Commerce Composable Storefront (Spartacus).
- Improved initial page load time by 40% by optimizing component structure and applying Angular and Spartacus frontend best practices.
- Extended and customized Spartacus services and integrated backend APIs to support scalable storefront functionality and consistent data flow.
- Contribute to modular frontend development, performance optimization, technical problem solving, and code quality within a distributed Agile team.
- Participate in code reviews and technical discussions, helping maintain engineering standards and reusable implementation patterns.

Senior Technical Lead | Comviva Technologies | Aug 2021 – Jan 2025 | Remote

- Led a remote frontend team of 7 to 10 developers delivering scalable Angular-based finance applications.
- Improved delivery speed by 80% through technical leadership, architecture compliance, development practices, and effective team coordination.
- Collaborated with product and design teams across time zones to define features, resolve technical requirements, and improve UX consistency.
- Conducted code reviews and maintained frontend engineering quality; worked with Cypress and test automation practices.
- Implemented Micro Frontend proof of concepts using Luigi and Nx to evaluate modular and independently maintainable frontend architectures.

Software Development Engineer | Hopscotch Wholesale Trading Pvt Ltd | Mar 2021 – Jul 2021 | Remote

- Led migration from a monolithic frontend to modular packages using Lerna, improving maintainability, enabling parallel development, and accelerating feature delivery.
- Partnered with backend engineers to define and refine API contracts, improving full-stack alignment and frontend delivery timelines.
- Conducted SEO audits and implemented mobile-first optimization strategies to improve search visibility and frontend performance.
- Achieved a 20% improvement in mobile performance scores using Lighthouse audits and responsive design strategies.

Frontend Developer | AdGlobal360 India Pvt Ltd | Jun 2019 – Mar 2021 | Gurgaon, India

- Designed and implemented scalable web interfaces for automotive applications using modern frontend architecture and development practices.
- Optimized website code and structure to improve page loading, user experience, and search engine rankings.
- Developed and deployed a software update that reduced system errors by 30% and improved application performance by 25%.
- Partnered with UI/UX stakeholders to validate technical feasibility and optimize applications for speed and scalability.
- Implemented data-driven SEO initiatives that increased website traffic by 25%; used Google Search Console and Bing Webmaster Tools to monitor performance and identify issues.

Web Developer | Infodeal Technologies Pvt Ltd | Feb 2017 – Feb 2019 | Pune, India

- Gathered requirements and translated business needs into User Requirement Specifications and Functional Requirements.
- Developed responsive web interfaces using HTML5, CSS3, JavaScript, jQuery, AJAX, and JSON.
- Developed reusable jQuery components in an MVC microarchitecture framework using established design patterns.
- Resolved cross-browser and cross-platform compatibility issues and integrated RESTful web services between server-side and client-side applications.
- Applied Shell Scripting fundamentals to improve development and project efficiency.

Software Engineer Trainee | Cognitive Machines Software Solutions Ltd | Aug 2016 – Nov 2016 | Bangalore, India

- Developed responsive web interfaces for automotive applications, improving user experience by 30%.
- Applied coding standards and frontend best practices to improve consistency and maintainability.
- Applied frontend optimization techniques, including image sprites, to reduce page size and load times.
- Worked with UI/UX designs to ensure technical feasibility, responsiveness, speed, and scalability.

ARCHITECTURE & TECHNICAL HIGHLIGHTS

- SAP Commerce Composable Storefront: Angular/Spartacus storefront development, Spartacus service customization, backend API integration, modular storefront functionality, and performance optimization.
- Micro Frontend Architecture: Hands-on proof-of-concept experience with Nx and Luigi, plus modular frontend packaging using Lerna.
- Frontend Performance: Page-load optimization, component optimization, Lighthouse analysis, responsive optimization, and measurable performance improvements.
- Technical Leadership: Led a 7-member remote frontend team, conducted code reviews, supported architecture compliance, and collaborated with product, design, and backend teams.
- SEO & Modern Web: SEO audits, mobile-first development, search performance monitoring, and frontend optimization for improved visibility and user experience.

KEY ACHIEVEMENTS

- Improved AGCO SAP Spartacus storefront initial page load time by 40%.
- Led a 7-member remote frontend team and improved delivery speed by 80%.
- Improved Internet Banking application performance by 85% through frontend rendering optimization.
- Achieved 20% improvement in mobile performance through Lighthouse and responsive optimization.
- Reduced system errors by 30% and improved application performance by 25%.
- Increased website traffic by 25% through data-driven SEO initiatives.

EDUCATION

Master of Computer Application (MCA) — National Institute of Technology, Jamshedpur | 2013 – 2016

Bachelor of Science in Information Technology — Kolhan University, Chaibasa | 2010 – 2013

TARGET ROLES

Senior Frontend Engineer | Lead Frontend Engineer | Frontend Lead | Principal Frontend Engineer | UI Architect | Frontend Architect | Technical Architect
